SYSTEM REQUIREMENTS AND NETWORK SETTINGS

Operating System
- Windows 7 or higher (64-bit only)
- Apple macOS 10.12 (Sierra) or newer
- Linux (unsupported, not available yet)

Hardware
- 1.5 gigahertz (GHz) or faster 64-bit (x64) processor
- at least 2 GB of RAM
- Microphone and speakers (headset recommended)
- Webcam

Internet connection
- Cable or DSL connection with 6 MBit/s downstream (16 MBit/s recommended)*

* The automatic bandwidth control in alfaview ensures that the upper limit of 6 MBit/s is not exceeded, regardless of the number of participants. This calculation takes into account one active screen share. Each additional screen share adds another 1.5 MBit/s to the overall bandwidth consumption.
**Network**

- A wired network connection is preferred over a wireless one.
- Please make sure that the website alfaview.com is accessible.

The following port shares are required to be able to use alfaview®:

<table>
